Gen Insects

In &
Outside

Address: Heinrich Ave, Karenpark, Pretoria

Date	Area	Treatment Done:
Apr 2019	Inside - Restaurant	<ul style="list-style-type: none">Most of the areas in the restaurant area were sprayed and treated for general insects, including the play areas insidePestimators could not spray the first right hand section of the restaurant due to a staff meetingThe aerosol dispensers were checked, except the 3 on the right hand side due to a staff meeting. No canisters needed to be replaced
	Inside - Kitchen	<ul style="list-style-type: none">All areas in the kitchen area were sprayed, baited and treated for general insects, including cockroachesThe UV insect lamps were inspected. No glue boards needed to be replaced with new boards.
	Inside - Bathrooms	<ul style="list-style-type: none">All bathrooms in the restaurant area was sprayed and treated for general insectsThe tins in the bathroom dispensers were inspected. No canisters needed to be replaced.
	Outside – Perimeter wall	<ul style="list-style-type: none">The entire outside wall perimeter was sprayed and treated for general insects
	Outside - Refuse area	<ul style="list-style-type: none">All areas in the restaurant area was sprayed and treated for general insectsTwo areas in the refuse area were wrapped and re-painted with Amarillo Fly Wrap.

Area	Findings
Refuse area	In general we found that this area is at a manageable state with regards to all general pests associated with restaurants. Pestimators wrapped and re-painted 2x areas with fly wrap to curb the fly infestation in this area. It is our recommendation to install an aircurtain at the back of the kitchen leading to the refuse area, to get the fly infestation under control.
Inside Dining area	All areas inside the restaurant were sprayed. The aerosol cans were inspected. None of the canisters needed to be replaced
Inside Kitchen area	All relevant areas in the kitchen area were treated against cockroaches and any other general insects. All relevant areas were baited and sealed for cockroaches.

Outside perimeter walls

The entire outside perimeter walls were sprayed for all general insects, including in the play area.
