Customer: Topaz Court

Rodents

Outside

Address: 7 Iris Cres, Murrayfield, Pretoria

Date	Area	Treatment Done:
Mar 2019	Outside – Garden and road side	<ul style="list-style-type: none">- All tamper proof boxes were re-baited. The activity on the roadside and garden have increased.- Pestimators are of the opinion that the increase is due to more food traffic on the road's side- It is still manageable, but we will monitor this area closer for the next 3 months
	Outside – Washing and refuse areas	<ul style="list-style-type: none">- All tamper proof boxes were re-baited. There is still activity at these areas, but are currently manageable.- The refuse area will be monitored as we noticed some activity
	Outside – Ledges and veranda roofs	<ul style="list-style-type: none">- All tamper proof boxes were re-baited.- We have noticed that the activity did decrease, but this area will be monitored closely due to the increase in activity on the garden and road side.

Area	Findings
Outside	<ul style="list-style-type: none">- It is our recommendation that you do a treatment for garden snails- The snails are feeding on the rodent bait that will cause an increase of activity in all areas of the complex.- This treatment can be done every month or every second month, depending on the infestation
