Rodents

Outside

Address: 361 9<sup>th</sup> Street, Midrand

Date	Area	Treatment Done:
Feb 2019	Building 1 – Acacia	<ul style="list-style-type: none"><li>There is an infestation of snails at this building / Due to this, your rodent activity has increased</li></ul>
	Building 2 – Baobab	<ul style="list-style-type: none"><li>All rodent bait stations had to be re-baited due to the snail infestation at this building. The effected boxes were treated for snails, but we noticed an increase at the far end, closest to the field area.</li></ul>
	Building 3 – Coral	<ul style="list-style-type: none"><li>The activity at this building has decreased, although we had to rebait the boxes in the middle at the stairs again.</li></ul>
	Building 4 – Flamethorn	<ul style="list-style-type: none"><li>All boxes were checked / The activity is still manageable at this stage.</li><li>One of the boxes had to be re-baited due to snails</li></ul>
	Building 5 – Dombeya	<ul style="list-style-type: none"><li>All boxes were checked and some were re-baited / We did find some snail activity in some of the boxes. This will cause the rodent infestation to increase / We will still monitor this area closely.</li></ul>
	Building 6 – Gardenia	<ul style="list-style-type: none"><li>All boxes were checked / Rodent activity increased due to the snail infestation at this building</li></ul>
	Building 7 – Ebony	<ul style="list-style-type: none"><li>All boxes were checked and re-baited / There was an increase in activity, but is still manageable at this stage.</li></ul>
	Refuse area	<ul style="list-style-type: none"><li>All boxes were checked and re-baited</li><li>Increased rodent activity detected in the main refuse area only due to the refuse bags not being taken away immediately</li></ul>

Area	Findings
Refuse area	In general we found an increase of activity in this area. This area will be monitored closely with each visit, as the rodents are attracted to the refuse.
Buildings 1 – 7	In general there was a decrease in rodent activity in the complex. We have also found a big increase of snail activity at some of the buildings. We will be spraying poison at the effected boxes only.

General findings	Just a reminder, with regards the rodent boxes that need to be re-installed and replaced, please can you advise the cleaning staff not to move or damage the boxes, as this will cause an increase of rodent activity and will end is extra costs to the trustees when we need to replace these boxes.
